Andrew Jackson)

Hawaii National Guard Hazmat Specialists Sharpen Skills on Garden Isle

154th Wing Public Affairs - Story by Senior Airman Orlando Corpuz - Thursday, August 31, 2017

Hazmat specialists from the Hawaii National Guard's 93rd Civil Support Team, took their unique capabilities to the "garden isle" of Kauai to participate in Kauai County Exercise 2017 [KCE17], Aug. 28-30.

Held primarily on the U.S. Navy's Pacific Missile Range Facility [PMRF], KCE17 is a Chemical, Biological, Radiological, Nuclear, Explosive [CBRNE] threat and response exercise.

The three-day training event tested the coordination between federal, state, county, and non-governmental units responding to natural or man-made Hazmat incidents.

A host of first responders ranging from Kauai County Police and Fire departments, Hawaii Department of Health, PMRF, Kauai Emergency

Management Agency, and CST units from Hawaii, Guam, Alaska, and Utah National Guards came together to practice and validate the tactics, techniques, and procedures needed to effectively respond to a real world CBRNE incident.

"We are here to support the first responders in the event of a catastrophic event," said U.S. Air Force Lt. Col. Alvin Sato, commander, 93rd CST. "Working collaboratively with the first responders...the more times we work with them, the more we understand each other's strengths and weaknesses."

Incident command during a domestic CBRNE event would fall to civilian authorities. It's the job of the 93rd CST and the 57 other CST units spread throughout the nation, to support civil authorities by identifying CBRNE

substances, assessing current and projected consequences, and advising on response measures.

Large exercises such as KCE17 are held throughout the year within different counties with planning starting one year in advance.

PMRF, with its large area and multitude of structures allowed exercise planners to develop complex and challenging scenarios. Simulated drug cooking labs, hostile personnel, and bunkers with possible anti-personnel traps were some of the challenges posed to first responders.

"The exercise gave us the opportunity to push our new guys as well as our seasoned personnel," said Tech. Sgt. Noah Raymond, Recon Team Leader, *Continued on page 2*

Garden Isle - Continued

93rd CST. "It allowed all of us to bump up to another level and experience new positions and situations that we aren't necessarily use to."

As the science officer for the 93rd CST, Army Capt. Sean Cripps helped the exercise effort through analysis of the data and intel collected by the joint teams sent into hot zones.

"My main duty is to provide technical advice on the hazards that are found and interpret the meaning and significance," Cripps said. "I look at the downrange readings, the instrumentation data that's collected, intelligence data and synthesis that into the 'so what' component... what is the impact of this to our public and to the response effort."

KCE17 also included tabletop

and demonstration sessions between the various agencies.

According to Cripps, being able to work with agencies from multiple levels was a valuable part of the experience.

"This is a great opportunity for us to work with our first responder community from the county, state, and federal levels. This is important because we always want to work with people before something actually happens," Cripps said.

The 93rd CST is made of eighteen Hawaii Army National Guard soldiers and four airmen from the Hawaii Air National Guard.

The Hawaii Army National Guard along with Singapore Armed Forces conducted a sports day during the 37th annual Tiger Balm exercise at Mandai Hill Camp, Singapore Jul. 21, 2017. Soldiers participated in basketball, dodge ball and captain's ball team sports promoting exercise and fun. Celebrating its 37th consecutive year, this exercise enhances the professional relationship, combat readiness, and interoperability between the United States and Singapore Armies to meet and demonstrate regional security, partnership and resolve. This two-week long bilateral exercise is hosted in Hawaii on even years and in Singapore on odd years. Concurrently, this exercise is held at multiple locations in Singapore, Hawaii and Alaska with U.S. Command Post Exercise response cells at several locations. Soldiers utilize cyber war-gaming during this exercise and for the first time, Strykers and Terrex military vehicles are training and performing side by side.

Strengthening U.S. and Singapore partnership during Tiger Balm 2017

117th Mobile Public Affairs Detachment - Story by Sgt. 1st Class Theresa Gualdarama - Friday, July 28, 2017

"Tiger Balm exercise demonstrates a strong commitment to our regional security partnership with all involved," said Col. Steve Logan, chief of staff, HIARNG.

This marks the 37th annual exercise between U.S. Army Pacific and the Singapore Armed Forces promoting regional stability and security.

"This is the longest standing bilateral exercise in the SAF, with any defense partner," said Brig. Gen. Goh Si Hou, Commander 6th Singapore Division. "This speaks volumes not only for the strong bilateral ties between our two nations and militaries, but the value and trust we continue to hold in this special relationship."

Tiger Balm 2017 enhances the professional relationship, combat readiness, and interoperability between the United States and Singapore Armies to meet and demonstrate regional security partnership and resolve.

"Our Armies can make use of this platform to inter-operate and learn from each other from the planning to execution phases of operation," said Col.

James Teo, chief of staff, 6th Singapore Division, "Such training in peacetime will be beneficial should we be called upon to operate alongside one another."

The partnership between U.S. and Singapore armed forces and the professional value of this exercise will continue to deepen, said Brig. Gen. Goh.

"Singapore and U.S. Armed forces worked very well together during this exercise; the knowledge and experience gained through hard work, sweat and determination that will illustrate the relevancy of this exercise," Maj. Gen. Arthur Logan, State Adjutant General.

This two-week long bilateral exercise is hosted in Hawaii on even years and in Singapore on odd years. Concurrently, this exercise is held at multiple locations in Singapore, Hawaii and Alaska with U.S. Command post exercise response cells at several locations.

"U.S. and Singapore military leaders envisioned and developed a command post exercise designed to win in a complex world," said Col. Logan. "They can validate their staff's planning

processes, tactics and commitment of forces to extract critical lessons learned without the accompanying violence and expense of actual combat."

For the first time in SAF history, a Stryker unit is operating in Singapore executing live-fire and field exercises to further strengthen the operations and tactics, techniques and procedures for U.S. Strykers and Singapore Terrex units.

United States Army Pacific, 25th Infantry Division, the Hawaii Army National Guard along with Singapore Armed Forces collaborated to conduct the 37th annual Tiger Balm exercise at Mandai Hill Camp, Singapore Jul. 22, 2017.

Soldiers with Hawaii National Guard's rope rescue team package a victim in preparation for a high angle rescue during the Combined Training Exercise at Kalaeloa, Hawaii, July 17, 2017. A Combined Training Exercise is biannual training event that affords CERFP team members opportunities to grow in their disaster response skills. (Air National Guard Photo by Tech. Sgt. Andrew Jackson)

Hawaii National Guard Maintains Readiness Through Combined Training Exercise

State of Hawaii, Department of Defense, Public Affairs Office - Story by Tech. Sgt. Andrew Jackson- July 21, 2017

In the event of a natural or human-caused disaster the Hawaii National Guard has a unit of Soldiers and Airman who are ready to respond. If city and county resources are unable to respond to a large scale event in the islands, they would request support from the Hawaii National Guard. The Guard could then activate their Chemical Biological Radiological Nuclear Enhanced Response Force Package (CERFP) team and send them to respond. The rescue unit, comprised of Soldiers and Airman who have volunteered for this additional duty, could be on-site and assisting in operations aimed at diminishing human suffering within two hours. It is this type of response that the 200 person unit recently practiced during their biannual combined training exercise.

"Our goal with the training here is to insure we can get a good patient through-

put during an event," said Maj. James Kanoholani, Commander, HING CERFP. "We can't train during our regular drill, or annual training, so this exercise gives us the opportunity to train the new members and refresh those who have been here a while."

Disasters rarely happen close to facilities where victims can be treated. The CERFP team has a fleet of trucks and trailers, each meticulously packed with all the supplies they will need to respond, including the temporary structures in which they operate out of. These trucks and trailers can be loaded on an air transport and flown to the neighbor islands as well.

A key aspect of the HING CERFP is that for most the members of this specialized unit is a second job or additional duty. They are still required to stay proficient and up to date in their primary

duty at their home unit. Training in their CERFP responsibilities must be accomplished separately. The Combined Training Exercise which is held twice a year is how the Soldiers and Airmen get the experience and training in their role in an response to a natural or human-caused disaster.

Throughout the footprint of the disaster response effort there are many specialties represented. At a disaster, site search and extraction Soldiers provide rope rescue, collapsed structure shoring, breaching and breaking, while rescue Airmen provide emergency medical treatment. The

Continued on page 05

Members the Hawaii National Guard's search and extraction team deliver a disaster victim to the recitation area for decontamination and medical treatment during the Combined Training Exercise at Kalaeloa, Hawaii, July 17, 2017. A CTE is biannual training event that affords CERFP team members opportunities to grow in their disaster response skills. (Air National Guard Photo by Tech. Sgt. Andrew Jackson)

Readiness - continued

disaster victims 'if needed' are then transported to the treatment site where they are triaged, decontaminated, and treated medically to stabilize the victims in preparation for release or transport to hospitals. There are also Airmen on-site who provide casualty collection services. All the movement and operations are carefully coordinated in the command and control tent. Communications services are provided by an Air Guard Joint Incident Site Communications Capability - package that provides cell and internet services for miles around the disaster site.

Active Duty Airmen and Marines who specialize in Chemical Biological Radiological Nuclear operations toured the site on the final day of the field training. This provided an opportunity for the HING CERFP unit to grow their network in the islands.

The disaster victims were played by actors who were made up in moulage makeup to simulate their injuries. They played their part by wailing, screaming and sometimes wandering off to give the rescuers experience in dealing with actual human victims.

This disaster was created as an exercise, but the rescue Soldiers and Airmen of the HING's CERFP team are ready to respond in Hawaii to help the state and its residents recover.

Hawaii Air National Guard Master Sgt. Kerrie Morris, a loadmaster from the 204th Airlift Squadron, shows David Ige, State of Hawaii Governor, imagery from a Hurricane Harvey relief mission at Joint Base Pearl Harbor-Hickam, Hawaii on Sep. 10, 2017. The mission involved the tactical airdrop of generators, a mobile hospital and an ambulance among a long list of relief supplies. (U.S. Air National Guard photo by Senior Airman Robert Cabuco)

Hawaii Air National Guard Returns from Hurricanes Harvey and Irma Relief Missions

State of Hawaii Department of Defense - Lt Col. Charles Anthony

Joint Base Pearl Harbor-Hickam, Hawaii- A Hawaii Air National Guard C-17 Globemaster III that participated in Hurricane Harvey and Hurricane Irma relief operations recently returned home. Governor David Y. Ige and Hawaii National Guard representatives met the aircraft and crews as they arrived at Joint Base Pearl Harbor-Hickam.

Sixteen Airmen and the C-17 aircraft from the 204th Airlift Squadron, 154th Wing, departed Joint Base Pearl Harbor-Hickam on September 1. The C-17, carrying two flight crews and maintenance personnel initially flew to Memphis International Airport in Tennessee. From there, they flew 19 missions across the U.S. mainland and to the U.S. Virgin Islands where they transported relief supplies and National Guard soldiers to

hurricane-damaged areas. The Hawaii crew flew one of the first relief missions into the U.S. Virgin Islands after Hurricane Irma struck the Caribbean. That mission flew HH-60 MEDEVAC helicopters to St. Croix. All told, the Hawaii Air National Guard flew 19 sorties, delivering two helicopters, 18 vehicles, almost 200 passengers and more than 300,000 pounds of cargo to hurricane damaged areas in Texas and the U.S. Virgin Islands.

The 204th Airlift Squadron is one of three flying units within the Hawaii Air National Guard's 154th Wing, the largest and most complex wing in the entire Air National Guard. The Guard is tasked with being ready for war or any other operational contingency overseas and well as disaster response here at home.

Veterans Memorial Aquatics Center named after the honorable Mark Takai

Courtesy story from KITV

It was an emotional day as friends and veterans joined hearts for the K. Mark Takai Veterans Memorial Aquatics Center renaming ceremony at Central Oahu Regional park, Saturday afternoon.

Late congressman Takai died last July after a battle with pancreatic cancer.

Driven by passion to improve himself and the lives of others, Takai's life though short, did not go unrecognized.

"I think my best memory of him is just how he was always full of aloha and how he always wanted to help people. It's kind of what drove him throughout all of his life - to help people," wife, Sami Takai said.

Saturday marked his 50th birthday and the 50th year of coaching for his old-time swimming coach, Ken Suenaga.

Takai, his brother and sisters were swimmers themselves so their family grew up around the pool. It meant a great deal for Coach Suenaga to attend.

"It was a powerful bringing together of different groups and the memories, I could see, everyone felt," said Mayor Kirk Caldwell.

Mark Takai was a man of pride. Before getting elected to congress, he was

a Lieutenant Colonel in the Hawaii Army National Guard.

During his time at UH, Takai was a Western Athletic Conference Champion swimmer, so it was only fitting to name the center in his honor.

"Serving in the house with him and just watching him work the legislative process - the guy was one of the best - he knew how to get a bill passed and it was a real artwork I thought watching him do that," Caldwell said.

Mark Takai valued the Honolulu community and wanted his family to look up to him, which he later fulfilled working in the big house, alongside Mayor Kirk Caldwell.

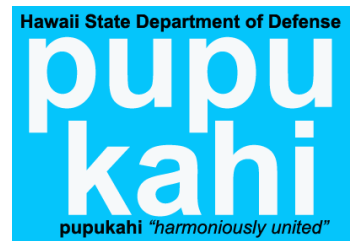

The renaming ceremony began with a beautiful Taiko drum performance by Somei Tiko of Aiea and was followed with a blessing from Misty Kela'i, Executive Director in the mayor's office of Culture and the Arts.

Purple ribbons were passed out by the Pancreatic Cancer Action Network as a reminder to all families battling pancreatic cancer everyday.

Members of the armed forces were able to watch as the memorial gates opened as well as be honored with aloha for their service.

Hawaii National Guard Welcomes Home Soldiers From Deployment

- 117th Mobile Public Affairs Detachment - Story by Pfc. Chavaughn Washington

The purpose of this event was to help readjust Soldiers in post-deployment, to a lifestyle outside of a deployed atmosphere.

"Reintegration is not something that you do on your own," said Maj. Deanna Manriquez, Operations Officer of the 103rd Troop Command. "It's something you use each other for to use the support system that is available to you."

The program included briefs from several different speakers who provided information regarding things such as resilience training, education benefits and stress management among several other subjects that are essential to the everyday lives of Guardsmen.

Various speakers attended the program in order to support the Guardsmen in ways that would make reintegration into society more seamless and ensure that they utilize all the benefits available to them.

September is National Preparedness Month. Governor Ige presented the Hawaii Emergency Management Agency with a proclamation on Friday, Sept. 8, 2017 at the ceremonial office. Attendees included Gen. Hara, Gen. Oliveira (R), Department of Emergency Management, Federal Emergency Management Agency, National Weather Service and Amateur Radio Club. HI-EMA is recommending residents prepare an emergency kit of a minimum of 14 days of food, water and other supplies.
